1963 CENSUS OF BUSINESS

volume four

WHOLESALE TRADE SUMMARY STATISTICS

**PART 1 U.S. Summary; Sales Size, Employment Size, Single
Units and Multiunits; Receivables and Bad-Debt Losses;
Sales by Class of Customer; Warehouse and Storage Space;
Petroleum Bulk Stations and Terminals; and
Legal Form of Organization**

DEPARTMENT OF COMMERCE, John T. Connor, Secretary
BUREAU OF THE CENSUS, A. Ross Eckler, Director

Acknowledgments

This report was prepared in the Business Division under the supervision of **Harvey Kailin**, Chief, and **Henry Wulff**, Assistant Chief for Census Programs.

John Albright, Chief, Wholesale Trade Branch, and **Earl Wiley**, Assistant Chief of the branch, were responsible for the wholesale trade segment of the Census of Business. **Bobby E. Russell**, and **Charles Settlemyer** participated in the analysis of data and preparation of the report. **Gerda Mones** was the division's liaison officer with the Jeffersonville Operation Office and supervised the division's professional staff at that office. **Gerald Post** contributed to the entire project, particularly in the collection and analysis of reports for the large and complex corporate organizations. Staff assistance was provided by **Ralph S. Woodruff**, Assistant Division Chief, Research and Methodology, and **Max Shor**, Assistant Division Chief, Staff and Special Projects.

Systems and procedures were developed in the Economic Operations Division, **M.D. Bingham**, Chief, by **Sol Dolleck**, Assistant Chief for Systems, assisted by **Samuel Schweid**, **Nathan Lesowitz**, and **Jack Margolis**. **Zigmund Decker** developed and supervised the electronic computer programming under the direction of **John S. Lannan**. Quality control plans and procedures were developed and supervised by **Herman H. Fasteau** assisted by **George Minton**. Others who participated in the development of systems and procedures were **Jack Scharff**, **Irving Weiss**, **Jerry S. Cooper**, **William W. Perry**, **Maxwell Jeane**, **Peter Ohs**, and **Carl Mueller**.

Processing of wholesale reports was performed at the Jeffersonville Operations Office under the direction of **Robert D. Krook**. **Gene P. King** and **Waller Wynne, Jr.**, were directly in charge of the Economic Census Operations Branch. Data processing and related operations were performed by the Data Processing Systems Division, **Robert F. Drury**, Chief, and **R. M. Micol**, Assistant Chief.

Louis Greenberg, in his capacity as Census of Business Coordinator, made important contributions to the planning and operational phases of the work.

□

The statistics presented in this volume incorporate the subject report series BC63-WS.

1963 CENSUS OF BUSINESS FINAL REPORTS

volume one

RETAIL TRADE—SUMMARY STATISTICS

- Chapter 1. United States Summary
2. Sales Size
 3. Employment Size
 4. Single Units and Multiunits
 5. Legal Form of Organization
 6. Miscellaneous
- Merchandise Line Sales:
- 7A. United States Summary
 - 7B. New England States
 - 7C. Middle Atlantic States
 - 7D. East North Central States
 - 7E. West North Central States
 - 7F. South Atlantic States
 - 7G. East South Central States
 - 7H. West South Central States
 - 7J. Mountain States
 - 7K. Pacific States

This volume incorporates the U.S. Summary previously issued as part of the area reports, series BC63-RA, and the subject reports issued as series BC63-RS. Chapter 6 was not published as a separate report.

volume two

RETAIL TRADE—AREA STATISTICS

A United States summary chapter and chapters for each State, the District of Columbia, Guam, and the Virgin Islands. Statistics are presented by kind of business for counties, cities, standard metropolitan statistical areas, and for selected towns and townships in New England, New Jersey, and Pennsylvania. The kind-of-business detail varies in accordance with the number of retail establishments in an area. This volume incorporates the area preprints, series BC63-RA.

volume three

MAJOR RETAIL CENTERS STATISTICS

A summary chapter and chapters for each of 116 standard metropolitan statistical areas (SMSA's). Each SMSA chapter presents statistics for retail trade by kind of business and for hotels and motion picture theaters (a) in the entire SMSA, (b) in almost all cities of 100,000 inhabitants or more, and (c) in central business districts of these cities. Each chapter also presents statistics for the major retail centers outside the central business district showing (a) sales and establishment counts in three major subgroups of retail trade and (b) establishment counts only by kinds of business. This volume incorporates the major retail centers preprints, series BC63-MRC.

volume four

WHOLESALE TRADE—SUMMARY STATISTICS

- Chapter 1. United States Summary
2. Sales Size, Employment Size, Single Units and Multiunits
 3. Receivables and Bad-Debt Losses
 4. Sales by Class of Customer
 5. Warehouse and Storage Space
 6. Petroleum Bulk Stations and Terminals
 7. Legal Form of Organization
 8. Commodity Line Sales
 9. Miscellaneous
 10. Public Warehousing

This volume incorporates the U.S. Summary previously issued as part of the area reports, series BC63-WA and the subject reports issued as series BC63-WS. Chapters 7 and 9 were not published as separate reports.

volume five

WHOLESALE TRADE—AREA STATISTICS

A United States summary chapter and chapters for each State, the District of Columbia, Guam, and the Virgin Islands. Statistics are presented by kind of business for counties, cities, standard metropolitan statistical areas, and for selected towns and townships of New England, New Jersey, and Pennsylvania. The kind-of-business detail varies in accordance with the number of wholesale establishments in an area. This volume incorporates the area preprints, series BC63-WA.

volume six

SELECTED SERVICES—SUMMARY STATISTICS

- Chapter 1. United States Summary
2. Receipts Size
 3. Employment Size
 4. Single Units and Multiunits
 5. Legal Form of Organization
 6. Hotels, Motels, and Tourist Courts
 7. Laundries, Cleaning Plants, Related Services
 8. Motion Pictures
 9. Miscellaneous

This volume incorporates the U.S. Summary previously issued as part of the area reports, series BC63-SA, and the subject reports issued as series BC63-SS. Chapter 9 was not published as a separate report.

volume seven

SELECTED SERVICES—AREA STATISTICS

A United States summary chapter and chapters for each State, the District of Columbia, Guam, and the Virgin Islands. Statistics are presented by kind of business for counties, cities, standard metropolitan statistical areas, and for selected towns and townships in New England, New Jersey, and Pennsylvania. The kind-of-business detail varies in accordance with the number of service establishments in an area. This volume incorporates the area preprints, series BC63-SA.

Introduction

AUTHORITY AND SCOPE—The Census of Business is required by law under 13 U.S.C., sections 131, 191, and 224. The 1963 census covered businesses in retail trade, wholesale trade, selected services, dental laboratories, and public warehousing operated in the United States, Guam, and the Virgin Islands. A separate 1963 Census of Business and Manufactures for Puerto Rico was conducted jointly with the Commonwealth Government. The figures in this volume include those issued previously in report series BC63-WS. For "Explanation of Terms," see appendix C.

KINDS OF WHOLESALE BUSINESS COVERED—This volume covers all establishments with one or more paid employees included in wholesale trade in accordance with the principles of the 1957 edition of the Standard Industrial Classification (SIC) Manual and its supplement¹ issued in 1963. Also included are wholesale liquor establishments operated by State and local governments.

Data for administrative offices, warehouses, and other units which service and are auxiliary to wholesale establishments, while generally excluded from the tables of this volume, are shown in tables 7, 8, and 9 of chapter 9. See appendix C for definitions of the kind-of-business categories for which data are shown in this volume.

METHOD OF ENUMERATION—Information for wholesale trade was obtained by means of a mail canvass. Report forms were mailed to all business firms included in the active records of the Internal Revenue Service as subject to payment of Federal Insurance Contributions Act (FICA) taxes (i.e., employers of one or more persons) and which were classified in the records of the Social Security Administration (SSA) as wholly or partially engaged in retail and wholesale trade, and in manufacturing and mineral industries. Also included were those classified in major groups 70 (except 702 and 704), 72, 73, 75, 76, 78, and 79 in the service industries portion of the SIC Manual; in SIC industry 8072, dental laboratories; and in public warehousing, SIC major group 42 (except 421). In addition, report forms were mailed to all establishments which the SSA had not classified by kind of business prior to mailing of census report forms. Each establishment was mailed a report form appropriate to its

SSA classification (for those cases for which SSA classification had not yet been established, a general purpose form was used), but its census classification was determined by replies to questions on the census report form.

COMPARISON OF THE 1958 CENSUS WITH THE 1963 CENSUS—In all major respects, the 1958 and 1963 censuses were conducted under similar conditions and procedures. Strict comparability of the data for the two censuses is limited by the following factors:

1. In 1958, Alaska and Hawaii had not yet been admitted as States. Consequently, in the publications of the 1958 census the totals for the United States included the then 48 States and the District of Columbia. Tables in the 1963 publications which show United States totals for 1958 have been adjusted to include Alaska and Hawaii.

2. The physical area of a number of urban places for which data are shown in the 1963 census is not the same as it was in the 1958 census because of annexations and other boundary changes which have occurred since 1958.

3. The number of active proprietors shown in this volume is based on crediting each sole proprietorship with one active proprietor and each partnership with two active proprietors for all businesses operated at any time during 1963. In the 1958 census each business was asked to report this number.

4. In 1963 a new method was used for assigning establishments to places. This system used a computer coding procedure based on an address reference file for the larger cities. This provided a more precise method for determining whether establishments were inside or outside of city boundaries than the previously used system which was based on respondent report of location. The new system avoids the difficulty resulting from the tendency of suburban respondents to identify their location as being in the adjacent city although actually located beyond that city's boundaries.

5. Sales branches and sales offices of manufacturers of construction materials and equipment such as structural steel, elevators and escalators, sprinkler systems, air-conditioning systems, automatic temperature controls, and prefabricated metal room dividers are omitted from wholesale trade in 1963 when such branches or offices negotiated contracts for installation of the products and the company provided employees for putting the products in place. Comparative data in this volume have not been adjusted for this change, the effect of which is of a minor order.

¹ Executive Office of the President, Bureau of the Budget, *Standard Industrial Classification Manual, 1957, and Supplement to 1957 Edition, 1963.*

6. The collection of data from petroleum bulk stations and terminals (Standard Industrial Classification 5092) for the 1963 Census of Business was divided into two parts. Some information on the 1961 operations, including the status of facilities as of April 1, 1962, was collected in 1962. An additional reporting covering operations during the year 1963 was made in 1964. The first enumeration was conducted in advance of the major part of the 1963 Census of Business in order (a) to supply the Office of Oil and Gas, U.S. Department of Interior, with information urgently needed for planning the allocation of petroleum products in case of a national emergency, and (b) to distribute the workload both for reporting companies and for the Bureau of the Census to facilitate more efficient use of limited resources. The 1962 enumeration provided measures of gallonage sales, capacity, and inventories, by products, together with information on plant facilities.

The second collection of data, which was conducted as a part of the regular enumeration in 1964, was designed to supplement information developed in 1962. It measured dollar sales, payroll, and employment—inquiries common to other business census questionnaires. Capacity was measured in both enumerations.

The two enumerations differed to some extent, hence comparisons between the two years are qualified. The first covered all petroleum bulk stations and terminals operated in 1961 or in the first quarter of 1962 that were in business in 1958, plus new—since 1958—facilities in existence in 1961 or first quarter 1962 that were operated by companies which had one or more bulk stations or terminals in 1958. Not covered in 1962 were facilities that came into the industry after 1958 and which were operated by companies not in the industry in 1958. The second enumeration included all facilities in business at any time during the year 1963.

The reporting unit differed slightly between the two enumerations as “relay or lock-

up” points (product storage facilities without employees) were reported separately in 1962, but in 1963 they were included with bulk stations, or terminals, of which they were a part. This latter resulted in a large count of the number of bulk stations in 1962 as compared with 1963, or earlier enumerations.

CENSUS DISCLOSURE RULES—In accordance with Federal law governing census reports, any data which disclose the operations of an individual establishment or business organization are not published. However, the number of establishments in a kind of business is not considered a disclosure, so that this item may appear in instances where other items of information for the same kind of business or locality are withheld.

TYPES OF AREAS COVERED—The 1963 census volumes provided wholesale trade data grouped by kind of business for a variety of geographic areas including:

1. In combination for the 50 States of the United States; also each census geographic region and division. (See region and division map at the front of this volume).

2. Each Standard Metropolitan Statistical Area (SMSA). The SMSA's included in these volumes are those which were delineated by the Bureau of the Budget, Executive Office of the President, and listed in its report **Standard Metropolitan Statistical Areas, 1964**.

3. Each county.

4. Each incorporated urban place (city, village, etc.) of 5,000 inhabitants or more. In addition, for the New England States data are provided for towns having 10,000 inhabitants or more, or an urban population of 5,000 or more; and in New Jersey and Pennsylvania, for townships with 10,000 inhabitants or more.

Most of the area detail for wholesale trade is found in volume V of the 1963 Census of Business.

Summary of Findings

1963 CENSUS ENUMERATION

GENERAL

Sales—Sales of wholesale establishments in the United States totaled \$358 billion in 1963, an increase of 25.4 percent over the \$286 billion recorded in the next previous Business Census year 1958 and 448.2 percent above the \$65 billion in 1929, the year of the first Business Census in the United States. The \$358 billion in 1963 was composed of \$157 billion sales by merchant wholesalers who buy and sell merchandise at wholesale on their own account; \$116 billion by sales branches and sales offices operated by manufacturers primarily for marketing products of their own plants; \$21 billion by petroleum bulk stations and terminals; \$53 billion by agents and brokers marketing merchandise at wholesale, on an agency basis; and \$10 billion by wholesale buyers and dealers in farm products, buying direct from farmers.

Sales of merchant wholesalers (firms who buy and sell merchandise on their own account and are not primarily engaged in manufacturing or producing the goods) increased from \$28 billion in 1929 to \$122 billion in 1958 and to

\$157 billion in 1963, an increase of 457.9 percent in the 34 year period.

The relationship of the trend in wholesale trade sales to trends in other parts of the economy is illustrated by data in the accompanying summary table A. This table shows an increase of 448.2 percent from 1929 to 1963 in sales of all wholesale establishments as a group compared with 457.9 percent increase in sales of merchant wholesalers, a 411.2 percent increase in retail trade, and 459.3 percent increase in the gross national product during the same period.

The increase since 1929 of 448.2 percent in wholesale trade reflects, in part, a 92.5 percent increase in wholesale prices as reported by the Bureau of Labor Statistics; but, after allowing for this change, there remains a substantial increment representing growth in the physical volume of wholesale trade. Per capita value increase also is indicated, as the increase in population from 122 million inhabitants in 1929 to 189 million in 1963 amounted to 55.6 percent. Thus the combined population-price increase amounted to 199.5 percent compared with the wholesale sales increase of 448.2 percent.

Table A presents these and other summary facts for the Business Census years 1929, 1939, 1948, 1954, 1958, and 1963.

TABLE A. Wholesale Sales and Other National Indicators: 1929 to 1963

Business census year	Population (1,000)	Population index (1929=100)	Gross national product		Sales, wholesale establishments, all types of operation		Sales merchant wholesalers		Sales, all retail stores		Wholesale price index, all commodities (1929=100)

Establishments—At the end of 1963 there were in the United States 308,177 establishments (places of business) primarily engaged in marketing merchandise at wholesale. In this num-

ber each wholesale location of organizations operating more than one place of business is counted separately. Except for the earlier census years 1929 and 1939, the number is

Figure 1

Percent Increase in Wholesale Sales: 1958 to 1963

limited to wholesale places of business that employed one or more persons on a payroll basis. The census of wholesale trade has been defined to exclude unincorporated businesses without paid employees and the wholesale trade statistics subsequent to the 1948 Census exclude new businesses.

An establishment is considered to be primarily engaged in wholesale trade when its principal business is buying and/or selling merchandise at wholesale, or acting as an agent or broker in marketing goods at wholesale. "At wholesale" includes marketing or selling merchandise to retailers; to other wholesale organizations; and to industrial, commercial, professional, institutional, and similar users. Establishments selling to customers primarily engaged in buying for business use, rather than for resale of the goods in the form purchased, are included as well as establishments selling to resellers.

The number of wholesale trade establishments increased from 164 thousand in 1929 to 190 thousand in 1939, to 216 thousand in 1948, to 287 thousand in 1958, and to 302 thousand in 1963. Alaska and Hawaii are in-

cluded in 1958 and 1963, but not in earlier census years. Alaska had 254 wholesale establishments in 1958 and 291 in 1963; Hawaii had 793 establishments in 1958 and 974 in 1963.

Inventories—Stocks of merchandise on hand for sale at the end of 1963 were valued, at cost, at \$20 billion, up 34.2 percent from 1958. They were up 292.7 percent in 1958 over the end of 1939 but only 188.9 percent in 1958 over 1929.

Employment and payroll—Wholesale trade establishments provided employment for 3,088,706 paid employees and 138,222 owners of unincorporated businesses as of mid-November 1963. In addition there were 143,900 employees of central offices and auxiliary units servicing wholesale establishments.

Payroll of wholesale establishments amounted to \$18 billion for the year 1963, up 36.7 percent from the \$13 billion in 1958; 620.9 percent above 1939; and up 519.4 percent from the first census in 1929. Payroll in 1963 of central administrative offices servicing wholesale establishments amounted to one billion dollars.

TABLE B. Wholesale Trade Summary—United States: 1929 to 1963

Business census year	Establishments (number)	Sales (\$1,000)	Inventories, end of year, at cost (\$1,000)	Payroll entire year (\$1,000)	Paid employees, work- week ended nearest Nov. 15 (number)	Active proprietors of unincorporated businesses (number)

¹Alaska and Hawaii included in 1963 and 1958 only.

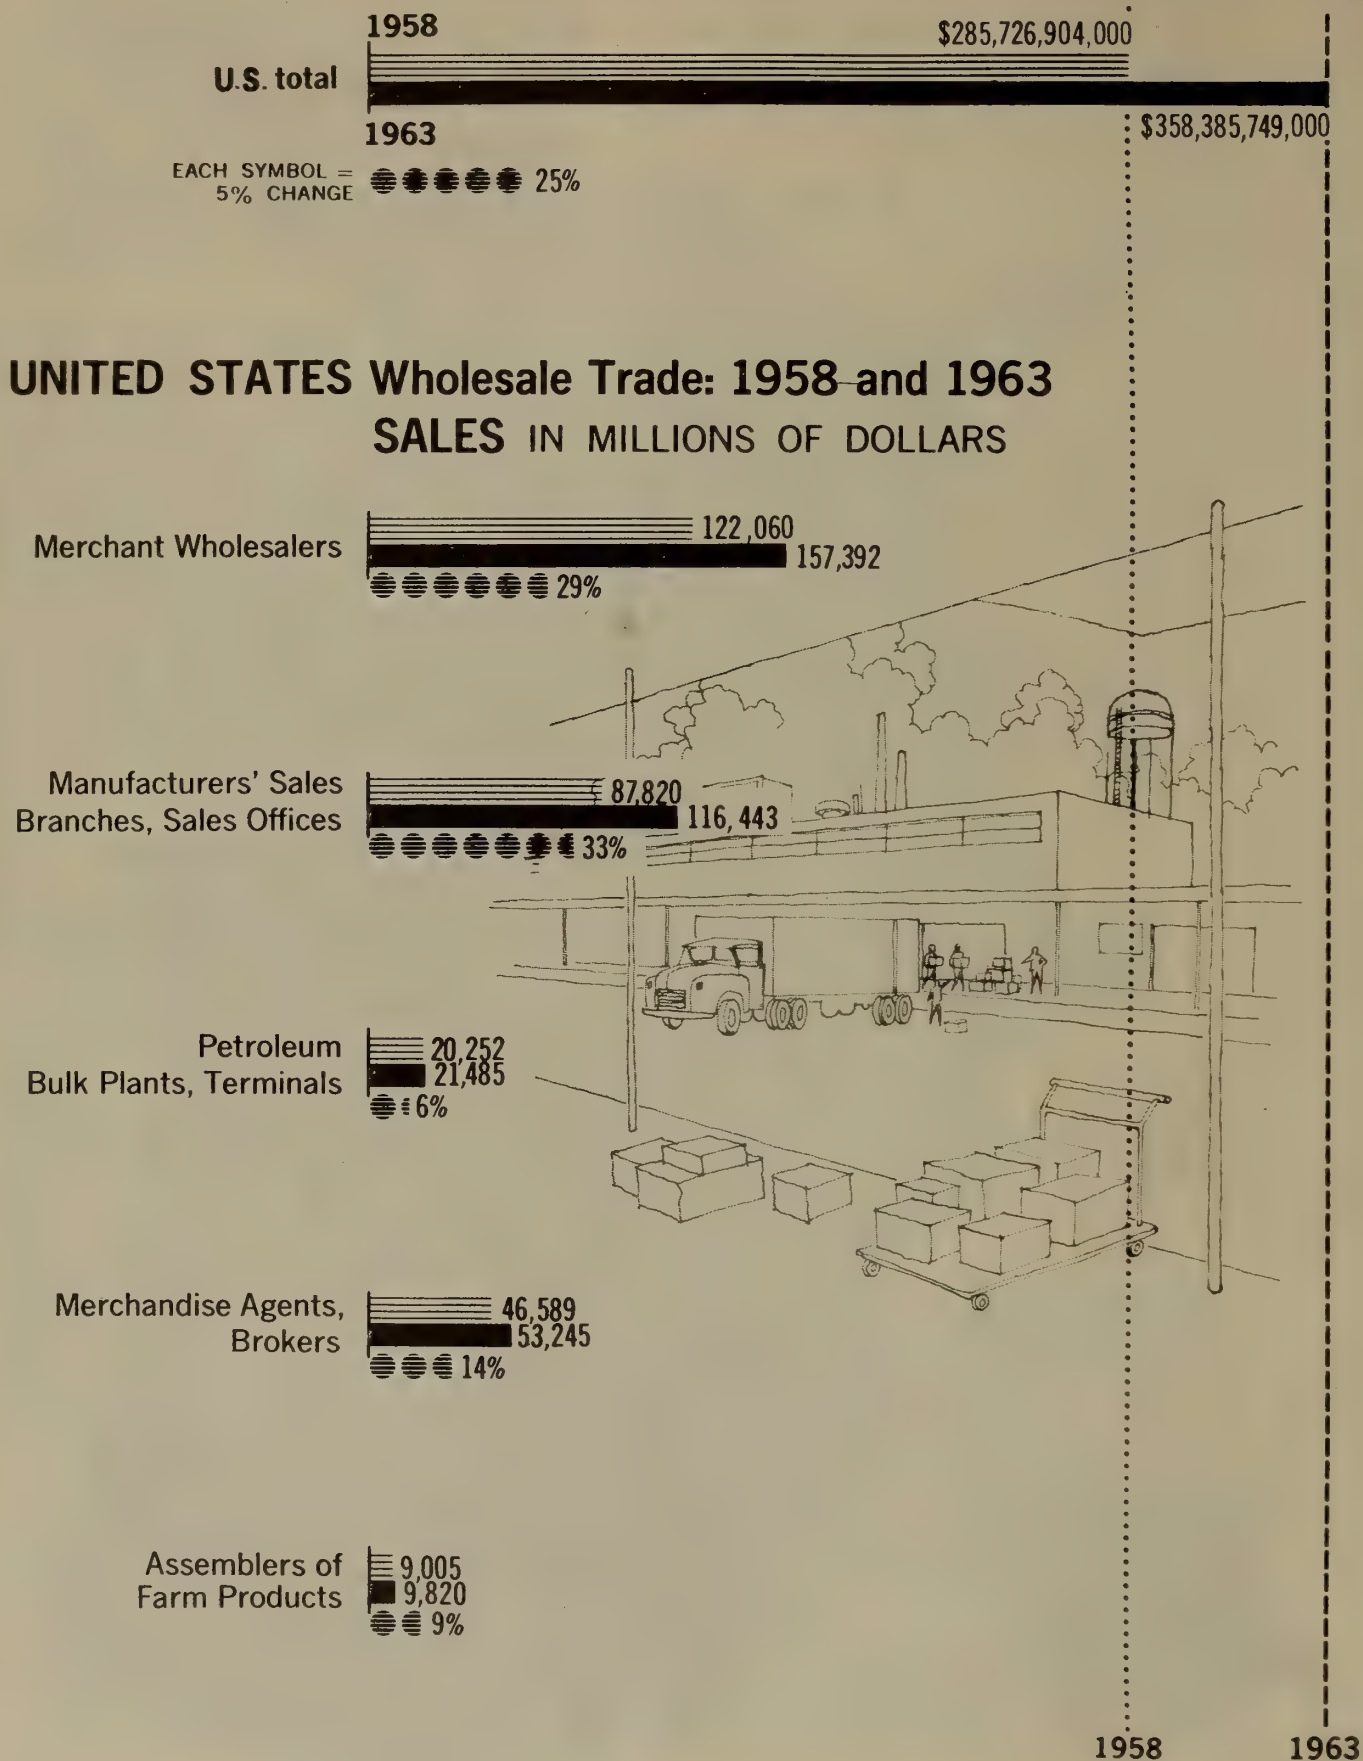

Type of operation—Wholesale trade, as defined in the Standard Industrial Classification (SIC) Manual in accordance with which censuses are conducted, includes more than is indicated in the terms "wholesaler" and "jobber." It encompasses all types of establishments primarily engaged in selling merchandise at wholesale—merchants, distributors, exporters, importers; merchandise agents and brokers, commission merchants; manufacturers' sales branches and sales offices operated apart from plants; and dealers buying products from farmers and selling at wholesale. For census purposes, wholesale trade is divided into five type-of-operation groups as listed below, and each wholesale establishment is assigned to one of the classifi-

cations according to the characteristics of its operation, or to the nature of functions performed:

- Merchant wholesalers.
- Manufacturers' sales branches and sales offices.
- Petroleum bulk plants and terminals.
- Merchandise agents and brokers.
- Assemblers of farm products.

These five groups are further subdivided into 23 detailed types as described in Appendix C, "Kind-of-Business Classifications." Summary information is presented for each of the various types in table 3, United States Summary, followed by kind-of-business data for each of the type groups, pages 1 to 11.

Figure 1

1963 CENSUS OF BUSINESS, U.S. Department of Commerce, Bureau of the Census

Merchant wholesalers have consistently constituted the most important type-of-operation group with sales varying from 43.2 percent of total for all wholesale trade in 1929, to 40.6 percent in 1939, and to 43.9 percent in 1963. The number of establishments for this type increased from 77,079 in 1929 to 208,997 in 1963, an increase of 171.1 percent. In 1963, manufacturers' sales branches and sales offices were second among the five groups from the standpoint of sales, \$116 billion or 32.5 percent of the total, but they ranked third in count of establishments. Merchandise agents and brokers ranked third in sales, \$53 billion, followed by petroleum bulk plants and terminals, \$21 billion, and assemblers of farm products, \$10 billion.

Each of the five type groups recorded sales gains in 1963 over 1958. Manufacturers' sales branches recording the largest rate of increase, 32.6 percent, followed by merchant wholesalers, 28.9 percent, and merchandise agents, 14.3 percent. Petroleum bulk plants and terminals and assemblers of farm products recorded only moderate gains, 6.1 percent and 9.0 percent, respectively.

Manufacturers' sales branches and sales offices also constitute the most rapidly growing segment over a longer period of time, with 24.7 percent of total sales in 1929, 26.5 percent in 1939, 28.1 percent in 1948, 29.7 percent in 1954, 30.7 percent in 1958, and 32.5 percent in 1963.

TABLE C. Wholesale Trade by Type of Operation—United States: 1929 to 1963

Assemblers of farm products.....	9.1	8.5	-1.0	364.5	140.5	

Note: Data for Alaska and Hawaii included in 1958 and 1963 but not for previous census years. Establishments without paid employees included in 1929 and 1939 but not in subsequent census years.

Kind of Business—In addition to classification by type of operation, each wholesale establishment is assigned a kind-of-business classification. The method of classifying and the kinds of business for which data are shown separately are described in Appendix C, "Kind-of-Business Classifications." Data are presented in table 1, Chapter 1, United States Summary, in the kind-of-business detail of the Standard Industrial Classification Manual. In the same table, type-

of-operation information is shown in summary and for each kind of business. Considerably more kind-of-business detail for 1963 is given in table 3, and for 1958 in table 4 of chapter 1.

Among the 38 broad kinds of business into which all wholesale establishments are classified in accordance with the SIC system, and for which data are shown separately in table 1, United States Summary, "Farm products—raw materials" (cotton, grain, livestock, leaf to-

bacco, etc.) ranked first with sales of \$34.8 billion in 1963. "Metals and minerals (except petroleum and scrap)" ranked second with \$26.6 billion; followed by "Automobiles, other motor vehicles," \$26.0 billion; "Commercial, industrial machinery, equipment and supplies," \$24.6 billion; and "Petroleum bulk stations, terminals," \$21.4 billion.

Merchant wholesalers (commonly referred to as wholesalers, distributors, jobbers, supply houses, etc.) who buy and sell merchandise, at wholesale, on their own account constitute the most important of the five major types of operation with \$157.4 billion of the \$358.4 billion in sales for all types combined. Table D presents data on sales of this type group by kind of business for the years 1963, 1958, 1948, 1939, and 1929.

Comparing 1963 with 1958, among merchant wholesalers seven kinds of business recorded sales gain of 40 percent or more, and 10 additional trades recorded gains of 30 to 39

percent, compared with the 28.9 percent average gain for all kinds of business combined. Trades showing 50 percent or more increase in sales included: Automobiles and other motor vehicles distributors, grain merchants, professional equipment and supplies distributors, metals service centers, and stationery wholesalers.

Only three merchant wholesalers kinds of business recorded sales declines from 1958 to 1963—fresh fruit and vegetable wholesalers, livestock distributors, and coal wholesalers.

When 1963 is compared with 1929 the largest relative sales gains among merchant wholesalers are noted among electrical goods distributors; construction machinery and equipment dealers; farm and garden machinery, equipment wholesalers; industrial equipment—supplies distributors; transportation equipment and supplies distributors; stationery, office supplies wholesalers; and amusement, sporting goods wholesalers.

¹Data for Alaska and Hawaii included in 1963 but not in previous census years.
²Data for Alaska and Hawaii included in total but not in other figures for 1958.
³Establishments without paid employees included in 1929 and 1939 but not in subsequent census years.

WHOLESALE TRADE GEOGRAPHICALLY

Wholesale trade is measured geographically for census purposes according to the location of the establishment from which the business is conducted, and from which all of the sales, employment, payroll, etc., are credited accordingly, regardless of the size of the sales territory covered. All of the business of the wholesale establishments located in Chicago, for example, is credited to Chicago even though sales territories may extend into several States. Data for traveling salesmen are included with establishments from which they operate.

Regions and Geographic Divisions—Table 5 of the United States Summary, Chapter 1, presents comparative information, 1963 and 1958, by type of operation for regions, geographic divisions, and States. Table 6 of the same chapter presents information for regions and geographic divisions by kind of business.

States—Wholesale trade data are presented by kind of business for each of the 50 States and the District of Columbia in separate chapters of volume V of the 1963 Census of Business. These chapters are also available as separate reports in the BC63-WA series. State summaries are presented in table 5, chapter 1, by type of operation and in table 9, chapter 1, by kind of business. The accompanying text table E ranks the States by wholesale trade sales size in 1963, 1958, 1948, 1939, and 1929.

Measured in terms of 1963 sales for all types of operation combined, New York led all other States with \$66 billion, or 18.5 percent of the United States total. California was second with \$35 billion, or 9.9 percent of the total, followed by Illinois with 8.1 percent, Texas with 5.1 percent, and Ohio with 5.1 percent. Sales for these five States totaled \$167 billion, or 46.7 percent of the total for the country as a whole.

Among merchant wholesalers, New York, California, Illinois, and Texas also ranked one, two, three, and four, respectively, in 1963. Pennsylvania, however, ranked number five among merchants. Sales of merchant wholesalers in these five States totaled \$74 billion, or 46.8 percent of the national figure.

Some changes from 1958 to 1963 are noted for all types of operation combined in the ranking of the first ten States, with New York, California, and Illinois ranking one, two, and three, in that order, in both years. Texas, however,

moved up from number six position in 1958 to number four in 1963, while Pennsylvania dropped from number four to number six. Ohio was in fifth position in both census years. Michigan maintained its number seven position; New Jersey moved up from tenth to eighth; while Missouri and Massachusetts each dropped by one to ninth and tenth, respectively.

Some rather significant ranking changes are noted between 1929, the time of the first census of business, and 1963, the latest comparable information. Among all types of operation combined Florida moved up 17 positions from 30 to 13; Arizona 11 positions, from 44 to 33; North Carolina 9 positions, from 23 to 14; and New Jersey 8 positions, from 16 to 8. The District of Columbia and Oregon each moved up seven positions among the States. States dropping back five positions or more included Kansas, Nebraska, Iowa, Oklahoma, and South Dakota.

Standard Metropolitan Statistical Areas (SMSA)

—These areas are defined by an inter-agency committee, under the direction of the Federal Bureau of the Budget, for purposes of compiling and presenting a wide variety of data on a uniform area basis. Titles and definitions of the 217 areas in the United States, together with the 2 standard consolidated areas—New York, N.Y.—Northeastern New Jersey and Chicago, Ill.—Northwestern Indiana—established as of August 4, 1964, appear in appendix D of this volume. A comparative summary, 1963 and 1958, is given in chapter 1, table 7, for each of the areas. Data are presented by kind of business for each of the areas in its respective State report.

The accompanying text table F presents a comparative summary for 1963 and 1958 of the 50 largest SMSA's as measured by wholesale trade sales volume in 1963. Approximately one-half of the wholesale establishments in the country were located in these 50 SMSA's in 1963. These establishments accounted for 71.7 percent of wholesale trade sales, slightly larger than the 71.3 percent in 1958. In contrast, population of the areas represented only 43.4 percent of the Nation's total in 1960.

New York, N.Y., SMSA ranked first by a wide margin having 16.1 percent of the 1963 total, with Chicago, Ill., SMSA second, at 6.6 percent, and Los Angeles—Long Beach, Calif., SMSA third, at 4.8 percent of the national total. The New York and Chicago SMSA's recorded slight declines in the percent of national total of 1963 as compared with 1958.

TABLE E. Wholesale Trade Sales in 1963 by States, Ranked by Sales Size 1929 to 1963

Ranking the areas by wholesale sales sizes, it is noted that the first 10 maintained the same order in 1963 as in 1958. Nineteen of the 50 areas moved up in rank by 1 position or more with San Jose, Calif., recording the largest increase, from 62 in 1958 to 48 in 1963. Other areas increasing their rank by 6

positions or more included Paterson-Clifton-Passaic, N.J., from 30 to 18; Washington, D.C.-Md.-Va., from 26 to 20; and Phoenix, Ariz., from 45 to 39. San Jose, Calif., and Akron, Ohio, were among the first 50 in 1963, but not in 1958.

Cities and Counties—Data on wholesale trade, 1963, are presented by counties and for cities and other urban places of 5,000 inhabitants or more in table 4 of each State chapter, Volume V, 1963 Census of Business. Table 6 of the State chapters presents information for counties with 100 wholesale establishments by kind of business. Table 8 of the United States Summary Chapter, chapter 1, presents summary information, 1963 and 1958, on establishments, sales, payroll, and employees for the 100 counties with the largest 1963 wholesale trade payroll. The accompanying text table G ranks the 50 largest wholesale counties by 1963 sales and shows their 1960 population together with rankings for previous business census years.

As shown in the accompanying text table G, New York County ranked first with 13.0 percent of wholesale trade of the country, followed by Cook County, Ill., with 6.3 percent, Los Angeles County, 4.8 percent, and Wayne County, Mich., 2.3 percent. Over one-fourth of the wholesale business of the United States is conducted by establishments located in these four counties.

New York County ranked first in wholesale sales, but seventh in population. Los Angeles County, Calif., however, ranked first in population but third in wholesale trade.

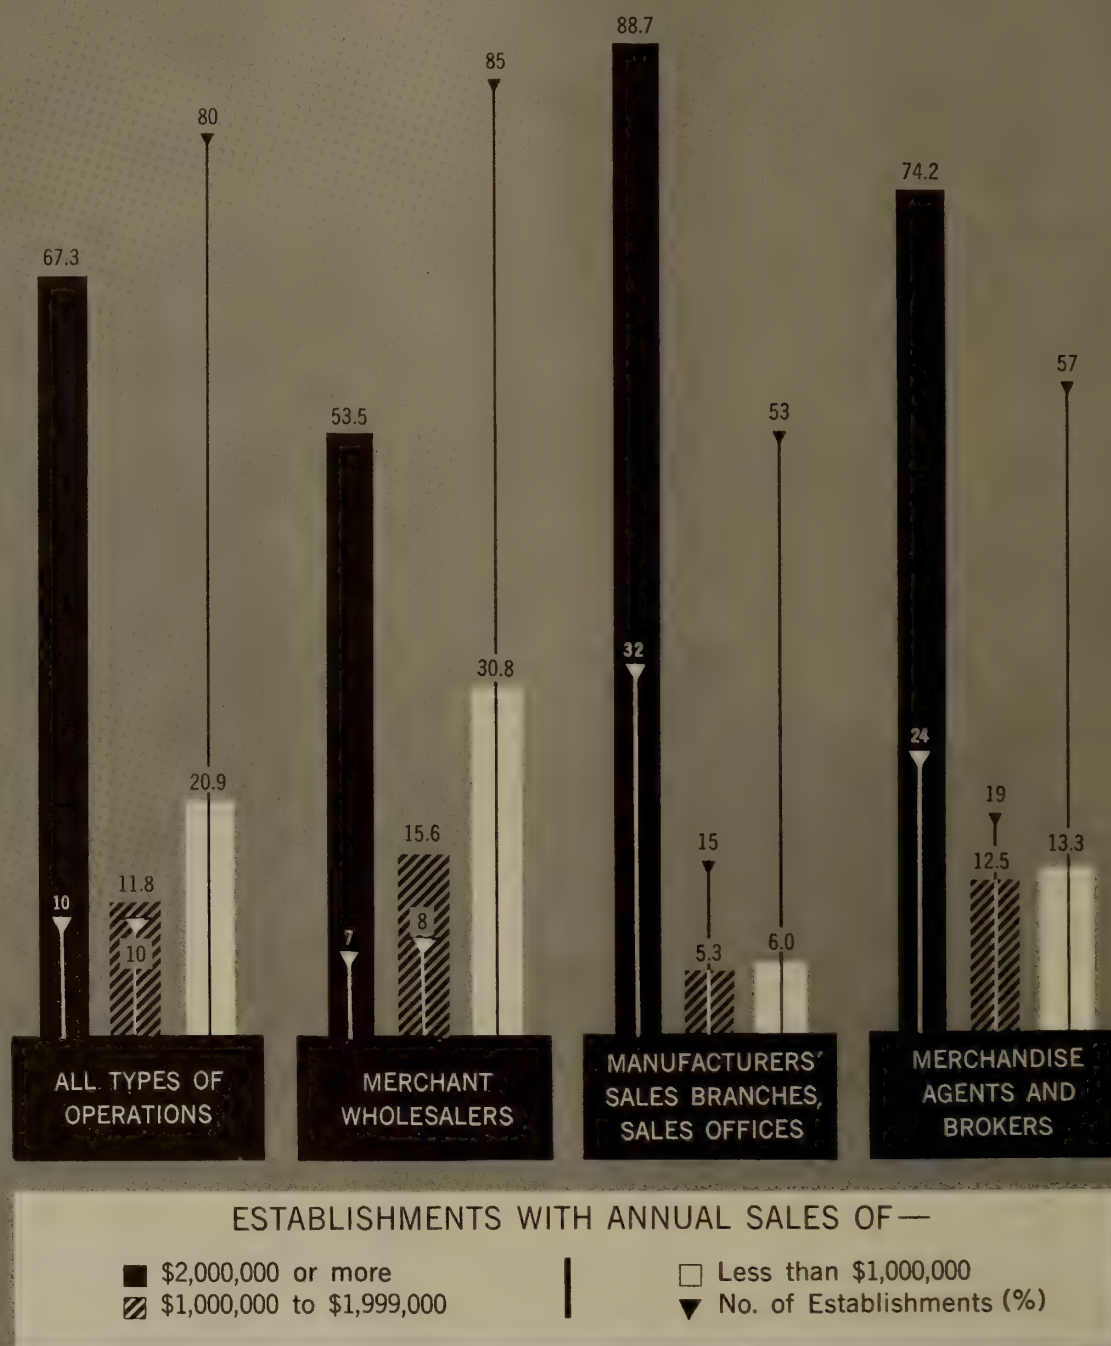

Comparing rankings in 1963 and 1929 many changes are noted. New York and Cook Counties have consistently maintained their number one and number two positions, respectively. Los Angeles County moved up from eighth to third in wholesale trade. Twelve counties in the first 50 in the 1963 census were not included in the 50 largest in 1929.

City size—Wholesale establishments are classified in chapter 1, table 11, by city-size groups according to the 1960 population of the city in which the establishments were located. An establishment is classified as inside or outside a city according to its street address and other evidence on its census return, and all of its business is credited to the area, regardless of how widespread its sales activities.

Five cities—New York, Chicago, Los Angeles, Philadelphia, and Detroit—were in the million-and-over population bracket in 1960. The five cities accounted for 25.9 percent of wholesale trade sales in 1963 but only 9.8 percent of the population in 1960. Cities of 100,000 inhabitants or more accounted for over three-fifths (62 percent) of wholesale sales but only 28.5 percent of the population. Establishments in rural, suburban, or other areas outside incorporated places of 2,500 inhabitants or less accounted for about two-fifths (36.0 percent) of the Nation's population but only 12.6 percent of wholesale sales.

SIZE OF WHOLESALE ESTABLISHMENTS

Wholesale establishments for 1963 are classified by size in chapter 2: sales size, employment size, city size, and single-units and multi-units (firm size).

Sales size—A concentration of sales is noted in the upper sales size brackets in contrast to establishment counts which tend to concentrate in the lower sales sizes. For example, 1,861 establishments, 0.6 percent of the total number of all wholesale establishments, each reported 1963 sales of \$20 million or more. These 1,861 establishments accounted for 26.4 percent of total wholesale trade sales. In addition, establishments in the \$10 to \$20 million annual sales bracket contributed only 0.9 percent of the number of places of business, but they ac-

counted for 10.7 percent of sales. Thus 1.5 percent of the establishments—those with the largest sales volume—accounted for over 37 percent of total sales. In contrast, 115,354 establishments reported 1963 sales of less than \$200,000 each. These smaller establishments contributed 37.4 percent of the total number but only 3.1 percent of sales.

The 1,861 establishments with sales of \$20 million or more included 478 merchant wholesalers, 1,028 manufacturers' sales branches and sales offices, 259 merchandise agents and brokers, and 96 other types (petroleum terminals and farm products assemblers). This same general pattern is noted for each of the major type-of-operation groups; i.e., a small number of establishments in the upper sales-size brackets accounting for a very large percentage of sales.

TABLE J. Sales Size of Establishments—United States: 1963

EMPLOYMENT SIZE OF ESTABLISHMENT

1963 CENSUS OF BUSINESS, U. S. Department of Commerce, Bureau of Census

Merchant wholesalers, all kinds of business combined, classified by sales-size groups and comparing 1963, 1958, and 1954, show upward movement in size brackets, partly reflecting the effect of increases in the level of wholesale sources and partly the growth in the physical volume of business. Establishments in the \$5 million-and-over sales bracket reported 29.5 per cent of total sales for this type group in 1954, 31.0 percent in 1958, and 33.9 percent in 1963. At the other extreme, establishments in the less-than \$200,000 annual sales bracket accounted for 7.0 percent in 1954, 6.3 percent in 1958, and 5.2 percent in 1963.

Operating expenses (including payroll), expressed as a percentage of sales, bears an in-

verse relationship to sales size, as establishments in the larger annual sales volume brackets recorded smaller expense ratios. This trend is consistent from smaller to larger sales brackets for each of the three census years covered in the accompanying text table K. Operating expenses in general showed a small increase for 1954, 1958, and 1963.

Payroll, expressed as a percentage of sales, shows the same general trend as operating expenses of which it is the major part. Payroll ratios have increased, generally, for the three census years 1954, 1958, and 1963; with larger sales-size brackets recording smaller payroll-to-sales ratios.

Employment Size — Wholesale establishments are tabulated by employment-size classes in chapter 2, tables 7, 8, and 9, based on the number of paid employees as of mid-November. A high concentration of establishments is noted in the smaller employment-size brackets with 62 thousand places of business having only one paid employee and 75 thousand with two or three employees, or 137 thousand (45 percent of the total) having fewer than 4 employees.

Measured in terms of number of paid employees per establishment, little change is noted in the period 1948 through 1963. The average number of employees for all types of establishments combined dropped from 10.7 per place of business in 1948 to 10.2 in 1954, to 9.8 in 1958, then rose slightly to 10.0 in 1963. Measured in terms of percentage of total sales, establishments with only one paid employee contributed 3.8 percent of sales in 1963 compared with 5.2 percent in 1954.

Those with 2 or 3 employees accounted for 7.5 percent in 1963 compared to 9.2 percent in 1948.

In both 1958 and 1963 the establishments having 50 or more employees were about 2.8 percent of the total number of establishments. In 1958 they accounted for 27.8 percent of total sales compared with 29.1 percent in 1963. The sales per establishment of this group climbed from \$9.8 million in 1958 to \$12 million in 1963.

A somewhat similar trend is noted among merchant wholesalers where the average number of paid employees per establishment, for all kinds of business combined, declined from 11.2 in 1948 to 10.1 in 1954, to 9.7 in 1958, then rose slightly to 9.9 in 1963. Average annual sales per employee, however, recorded consistent increases—from \$53 thousand in 1948 to \$61 thousand in 1954, to \$66 thousand in 1958, and to \$76 thousand in 1963.

(Size based upon total number of wholesale establishments operated by the firm)

1963 CENSUS OF BUSINESS, U.S. Department of Commerce, Bureau of the Census

TABLE L. Employee Size of Establishments-United States: 1948 to 1963

Employee size (mid-numbers)	Establishment 1963 (number)	Sales as percent of total				Payroll as percent of total			
		1963	1958	1954	1948	1963	1958	1954	1948

Firm Size — Firms or companies engaged in wholesale trade are classified in tables 12 and 13 of chapter 2 according to the total number of wholesale establishments operated by them at the end of 1963.

The 308,177 wholesale establishments were operated by 231,557 different firms, of which 217,309 firms or 93.8 percent operated only one wholesale place of business. These single-wholesale-establishment firms operated 70.5

percent of the places of business but contributed only 43.4 percent of 1963 sales of all wholesale establishments. Each of 8,018 firms, or 3.5 percent of the total number, operated two wholesale establishments. They accounted for 5.9 percent of sales. At the other extreme, 360 firms, or 0.2 percent of the total number, each operated 26 establishments or more; but these 0.2 percent accounted for one-third (32.7 percent) of all wholesale trade sales.

TABLE M. Wholesale Trade by Firm Size-United States: 1963

Firm size	Firms (number)	Establishments		Sales	
		Number	Percent of total	Amount (\$1,000)	Percent of total
United States, total.....	231,557	308,177	100.0	358,385,749	100.0
1 establishment.....	217,309	217,309	70.5	155,360,810	43.3
2 establishments.....	8,018	16,036	5.2	21,135,238	5.9

6 to 10 establishments.....	1,024	7,571	2.5	16,432,318	4.6
11 to 25 establishments.....	589	9,473	3.1	24,564,347	6.8
26 to 50 establishments.....	187	6,493	2.1	25,293,613	7.1
51 establishments or more.....	173	36,231	11.7	91,956,158	25.7

Table N presents a summary of sales of single units and multiunits by type of operation where it is noted that firms operating only one establishment accounted for 64.4 percent of the total business of merchant wholesalers and 75.9 percent for merchandise agents and brokers. Among manufacturers' sales branches and sales offices, however, they accounted for only 2.4 percent of total sales.

At the other extreme, firms with 51 wholesale establishments or more at the end of 1963 accounted for only 6 percent of the sales of merchant wholesalers and only 2 percent for merchandise agents and brokers;

but they contributed over one-half—56.8 percent—of the sales of manufacturers' sales branches and sales offices.

The pattern among assemblers of farm products is similar to that of merchant wholesalers and of merchandise agents and brokers, with firms operating only one or two establishments predominating in sales, accounting for 72.2 percent, while firms with 26 or more establishments contributed only 9.1 percent of the total. Petroleum bulk plants and terminals, on the other hand, are more like manufacturers' sales branches and sales offices, in that firms operating 26 or more establishments accounted for 68.8 percent of the total.

RECEIVABLES AND BAD-DEBT LOSSES

Forms used in enumerating merchant wholesalers in connection with the 1963 Census of Business provided for reporting end-of-year receivables—accounts and notes receivable derived from the sale of merchandise and on company books at the end of the year—and bad-debt losses—receivables written off during the year as uncollectable. Results of this inquiry are presented in chapter 3, table 1, for the country as a whole and in tables 2 and 3 for standard metropolitan statistical areas.

Of the 208,997 merchant wholesale establishments in business at the end of the year, 132,190 reported end-of-year receivables; 16,070 reported that they sold on a cash basis only, hence they had no receivables; 60,737 did not report on this inquiry. Sales in 1963 of those reporting end-of-year receivables amounted to \$127 billion; the establishments which reported all sales on a cash basis had \$6 billion in sales; those not reporting cash-credit information, reported sales of \$25 billion.

The accompanying text table P shows the trend in receivables as a percent of sales, 1939

to 1963; and in bad debt losses, 1949 to 1963. Bad-debt losses were not measured in 1939.

Receivables dropped from a high of 10.8 percent of sales in 1939 to 7.2 percent in 1948, then rose to 8.4 percent in 1954, reached 9.6 percent in 1958, and declined slightly to 9.5 percent in 1963. Receivables on the books of wholesalers at the end of 1963 approximated \$15 billion.

Receivables as a percent of sales varied by kind of business with Jewelry—watch—clock wholesalers reporting a high of 20.4 or slightly more than one-fifth of annual sales. Other trades recording receivables equal to 16.0 percent or more of annual sales included—

- Footwear wholesalers.
- Restaurant, hotel supply houses.
- Dental supply houses.
- Religious, school supply houses.
- Surgical, medical, hospital supply houses.
- Shoe service wholesalers.
- Camera, photographic supplies distributors.
- Toys, games, fireworks wholesalers.

1963 CENSUS OF BUSINESS, U. S. Department of Commerce, Bureau of Census

Diamonds, other precious stones, metals distributors.

Musical instrument, records, sheet music wholesalers.

At the other extreme, nine kinds of business each recorded a ratio of less than 5 percent—

New, used automobiles, motorcycles.

Volunteer group groceries.

Retailer-cooperative groceries.

Cotton.

Grain.

Livestock, except horses and mules.

Tobacco, tobacco products.

Beer.

Food, beverage basic materials.

Bad-debt losses, at the rate of 19 cents per \$100 in sales, of merchant wholesalers aggregated \$287 million for the year compared with \$180 million in 1958. Kinds of business recording losses of more than 40 cents per \$100 sales included—

Warm air heating—cooling equipment supplies distributors

Plumbing fixtures and supplies distributors

Restaurant, hotel supply houses

Construction, mining machinery equipment distributors

Laundry, dry cleaning equipment supply houses

Floor coverings wholesalers

Glass (flat, brick) distributors

Roofing, siding, insulation material distributors

On the low side, eleven kinds of business record losses of 5 cents or less per \$100 in sales.

SALES BY CLASS OF CUSTOMER

Sales of wholesale establishments in 1963 are analyzed by classes of customer in chapter 4 of this volume to show separately sales to industrial, commercial, etc., users (customers who normally buy for business use rather than for resale in the form purchased); sales to consumers and farmers (retail sales); sales to retailers of all types; sales to wholesale organizations; and export sales. For some kinds of business, sales to repair shops, to public utilities, to government, and to contractors and builders are also shown separately. Data are presented for merchant wholesalers, manufacturers' sales branches and sales offices, merchandise agents and brokers, and for assemblers of farm products in tables 1 and 3 of chapter 4. Data for merchant wholesalers are presented in tables 2, 4, and 5.

Table Q and the accompanying chart summarize the 1963 results for merchant wholesalers and show some significant historical trends.

Retailers still constituted the most important customers of merchant wholesalers in 1963, accounting for about two-fifths of their sales (40.8 percent). Industrial, commercial, etc., users constituted the second most important class of customer, accounting for 37.6 percent of the total; followed by sales to other wholesale organizations, 14.5 percent; export sales, 5.9 percent; and sales to consumers and farmers, 1.2 percent. Historically, the portion of sales to retailers has been declining—from three-fifths in 1939 to two-fifths in 1963. Sales to industrial accounts, on the other hand, represent a growing portion of the business—from 23.6 percent in 1939 to 37.6 percent in 1963. Sales to other wholesale organizations have also increased—from 11.6 percent in 1939 to 14.5 percent of the total in 1963. Export sales have remained fairly constant, at about six percent.

The increase in sales to industrial and institutional accounts is illustrated by the kinds of business shown in table Q. For example, institutional—industrial sales of meat wholesalers rose from 14.4 percent in 1939 to 32.2 percent in 1963. Sales to retailers declined from 72.7 percent to 41.6 percent during the same period, while sales from one wholesaler to another increased from 9.9 to 24.2 percent.

Electrical supplies and apparatus distributors show an interesting trend, historically, with sales to retailers declining from 42.7 to 17.1 percent of the total, while industrial—commercial, etc., accounts rose from 49.7 to 78.9 percent. The 78.9 percent in 1963 was distributed as follows: 41.0 to contractors and builders, 3.6 to government, 12.2 to public utilities, and 22.1 to other industrial concerns.

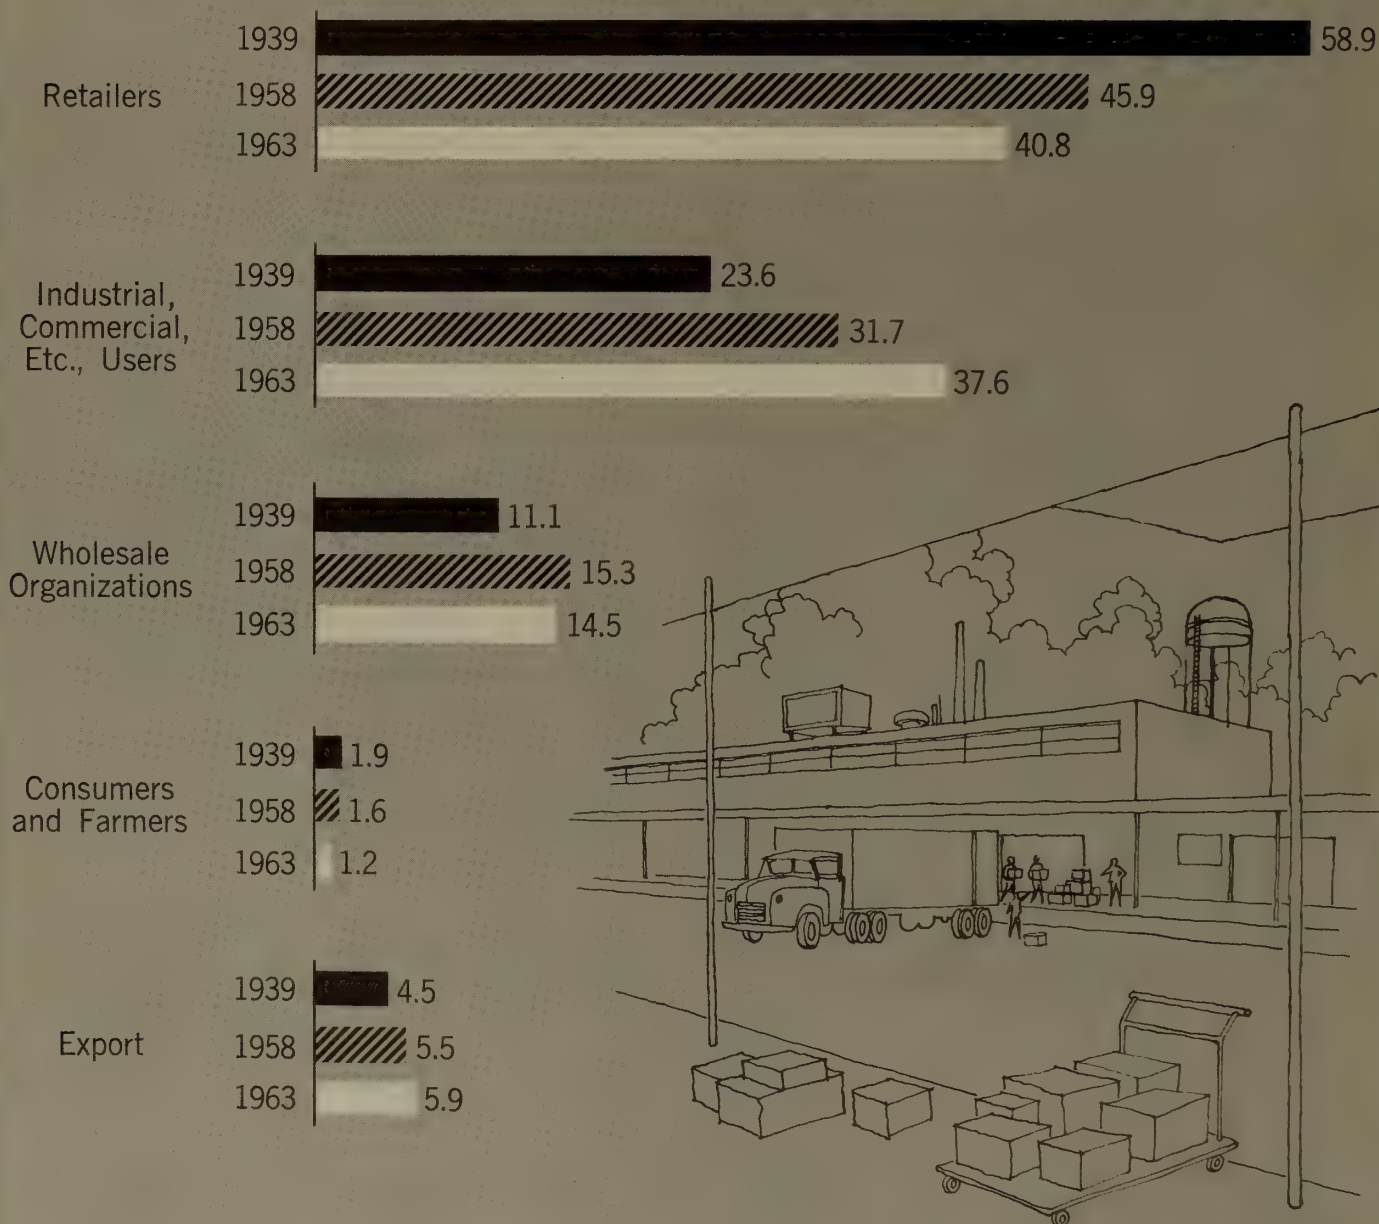

Manufacturers' sales branches and sales offices have shown little change in their pattern of sales by customer classes, 1939 to 1963, with industrial and similar users accounting for almost 45 percent of their sales, followed by retailers, about 30 percent, and other wholesalers, 20 percent.

Merchandise agents, brokers, and assemblers of farm products, like merchant wholesalers, show an increasing portion of their sales to industrial and similar users, accompanied by a decline in sales to wholesaler organizations.

¹Including 30.7 to repair shops.²Including 41.0 to contractors and builders; 3.6 to government; and 12.2 to public utilities.³Including 1.8 to repair shops.

WAREHOUSE AND STORAGE SPACE

Occupiable under-roof warehouse floor space, cold storage space, and bin space for the storage of loose grains are measured in chapter 5. Bulk liquid tank space of petroleum bulk stations and terminals is measured in chapter 6. Floor space and cold storage space were measured in the 1954 census, but not in the 1958. Bin space of grain elevators and tank space of petroleum bulk stations were measured in 1958 and in 1954, as well as in 1963.

Occupiable warehouse floor space is measured in square feet for all types of wholesale establishments except manufacturers' sales offices and petroleum bulk stations and terminals, types of establishments to which the inquiry does not apply. For kinds of business where the inquiry is most significant, space in single-story buildings is distinguished from floor space in multi-story buildings. Tables 1 and 2 of chapter 5 present floor space informa-

tion at the national level, table 3 for geographic divisions, and table 4 for States. Tables 5, 6, and 7 present data for standard metropolitan statistical areas.

Cold storage space is measured in cubic feet for "food and related products" trades in table 8, while bin space of grain elevators is measured in bushels by type of bin in table 9, chapter 5.

Floor space is shown for all establishments that reported 500 square feet or more as of the end of the census year. Since not all establishments reported these data, a measure of coverage is included in the tables. Ratios of inventories to floor space, based on information shown for establishments reporting more than 500 square feet, may be related to total inventories (including stocks of establishment not reporting as much as 500 square feet) to provide an indication of total floor space requirements for inventories of all wholesale trade.

WHOLESALE TRADE Warehouse and Storage Space

Wholesale Trade: 1963

Voluntary group grocery wholesalers	Cooperative group grocery wholesalers	Tobacco distributors
\$155	\$177	\$214

1963 CENSUS OF BUSINESS, U.S. Department of Commerce, Bureau of the Census

The number, sales, and inventories of establishments not reporting as much as 500 square feet of floor space are shown separately for several classes of establishments—drop shippers and other types of establishments that do not warehouse merchandise but have it shipped directly from suppliers to customers; establishments using public warehouses; establishments handling merchandise requiring little or no under-roof floor space; smaller businesses; and, some establishments having floor space, but who failed to so indicate on their census form.

It should be noted that figures given in chapter 5 cover only wholesale establishments as defined in appendix B. Data on space in auxiliary warehouses are presented in chapter 9, and for public warehouses in chapter 10.

Warehouse floor space—As shown in table 1 of chapter 5, wholesale establishments reported 1.5 billion square feet of under-roof floor space for storing merchandise as of the end of 1963; 1,189 million was reported by merchant wholesalers, 172 million by manufacturers' sales branches, 59 million by merchandise agents and brokers, and 62 million square feet by assemblers of farm products. The 1.5 billion

square feet for 1963 represented an increase of 14.6 percent over 1954, when the latest census measure was taken.

Merchant wholesalers reported inventories, valued at cost, equivalent to \$8.57 per square foot of floor space and sales for the year averaging \$77.63. Some wide variations are noted when sales and inventories are related to floor space by kind of business. For example (see text table R), tobacco distributors recorded 1963 sales of \$214 per square foot, cooperative group grocery wholesalers reported \$177, and voluntary group grocery wholesalers, \$155. In contrast, household furniture wholesalers reported 1963 sales of only \$33 per square foot, shoe service wholesalers reported \$38, and automotive equipment jobbers, \$43.

Soft drink distributors reported only \$2 in inventories per square foot of floor space, beer distributors, \$4, and household furniture wholesalers, \$4. On the high side (see text table R), dental supply houses reported \$20 in inventories per square foot of floor space, jewelry wholesalers, \$19, and piece goods wholesalers, \$16.

TABLE R. **Merchant Wholesale Sales and Inventories Per Square Foot of Warehouse Floor Space—United States: 1963**

Kind of business	Per square foot of warehouse floor space		Kind of business	Per square foot of warehouse floor space

			Shoe service wholesalers.....	38.20	6.72
			Household furniture wholesalers.....	32.55	3.92

Some interesting results are noted when warehouse floor space in single story buildings is compared with that in multi-story buildings, 1963 and 1954.

Although there was still a substantial square footage of warehouse space in multi-story buildings at the end of 1963, the trend was toward single-story buildings. Table S shows this trend, 1954 to 1963, for selected kinds of business, merchant wholesalers. For example, of the 22 kinds of business for which multi-story and single story data are shown separately in the table, only three reported more than 70 percent of their floor space was in single story buildings at the end of 1954; three more were in the 60 to 70 percent bracket; and six were in the 50 to 59 percent bracket.

By 1963, seven trades, reporting over 70 percent of their space in single story buildings, were led by beer distributors with 90.0 percent, welding supplies distributors with 87.6 percent, and soft drinks distributors with 84.3 percent. Six more trades were in the 60 to 70 percent bracket and four in the 50 to 59 percent bracket. Only five trades reported more than half the space in multi-story buildings in 1963, and none reported more than 70 percent. Kinds of business operating with more than 60 percent of the 1963 space in multi-story building included "apparel and accessories, hosiery, lingerie" with 64.9, furniture (household and office) with 63.0, and "dry goods, piece goods, notions" with 6.1 percent.

TABLE S. Merchant Wholesalers Warehouse Floor Space—United States: 1963 and 1954

Kind of business	1963		1954	
	Floor space (1,000 sq. ft.)	Percent in single story buildings	Floor space (1,000 sq. ft.)	Percent in single story buildings

Cold storage space—Refrigerated (net piling) space, 50° Fahrenheit or below, of wholesale food establishments totaled 252 million cubic feet, an increase of 47.5 percent over 171 million reported as of the end of 1954. States recording the largest amount of such space in 1963 included Washington with 32 million cubic feet, California with 28 million, Florida with 20 million, New York with 19 million, Illinois with 13 million, and Texas with 12 million cubic feet.

Grain bin space—Space in grain elevators (country and terminal) is measured in terms of bushel rated capacity for storing loose grains (table 9, chapter 5). This table includes country elevators primarily engaged in marketing grain purchased from farmers, and terminal elevators of grain merchandising companies. For descriptions of terms see appendix C. Mill elevators are not included in this report.

At the end of 1963 there were 633 terminal elevators and 7,653 country grain elevators in

the United States, a total of 8,286 such facilities. Of this number, 7,640 reported bin space totaling 2,972 million bushels. The space, by type of structure, included 382 million bushels in wooden bins, 1,127 million in concrete, 420

million in metal-round bins, 627 million in metal-flat or other metal buildings, and 44 million bushels in other type of structure including brick. Type of structure was not reported for 372 million bushels.

PETROLEUM BULK STATIONS AND TERMINALS

Chapter 6 of this volume is devoted to statistics on petroleum bulk stations and terminals (see appendix C for description of terms). As explained in the front of that chapter, two enumerations were made of these facilities. The first, conducted in 1962 in advance of the regular enumeration in order to supply the Office of Oil and Gas of the U.S. Department of Interior with information urgently needed for planning the allocation of petroleum products in case of a national emergency; and the second, as an integral part of the regular enumeration. As indicated in the explanation, coverage in 1962 was slightly different from 1963 or for other census years; hence 1962 data, although included in tables 7 through 14 of chapter 6, are omitted from this summary.

The total number of petroleum bulk stations and terminals (excluding LP gas stations), 1939 to 1963, declined slightly (with a net decrease during the interval of 1,515 establishments) from 30,825 to 29,310. A decided change, however, is noted in the type of station; a decrease of 3,260 in the number of bulk stations, but an increase of 1,745 in terminals (the larger facilities) from 220 in 1939 to 1,965 in 1963. This increase in terminals has been consistent, from 220 in 1939 to 743 in 1948, to 1,241 in 1954, to 1,632 in 1958, to 1,965 in the most recent census.

The trend toward large facilities is further illustrated by the increase in tank capacity from 7.8 billion gallons in 1948 to 12.5 billion in 1954, to 14.7 billion in 1958, to 17.8 billion in 1963.

³L. P. gas capacity only.

⁴Including bulk stations, terminals and L. P. gas stations.

In text table V States are listed according to storage capacity as of the end of 1963, with comparative rankings for previous census years. Total capacity is shown for 1963 where

it is noted that New York ranked first, followed by New Jersey, Texas, Florida, and Pennsylvania. These five States accounted for 33.6 percent of the national total.

LEGAL FORM OF ORGANIZATION

Chapter 7 of this volume presents information on wholesale trade, 1963, by legal form of organization. Tables 1 and 2 are for the United States as a whole, and table 3 is for States. Historical comparisons of wholesale trade in 1963 and 1958 are presented in the accompanying text table W for all types of operation combined and, separately, for merchant wholesalers and for merchandise agents and brokers.

Corporations predominate in wholesale trade; all types of operation combined accounting for 83.3 percent of total sales in 1963. Furthermore, they recorded a sales increase of 32.3 percent, 1963 over 1958, compared with an overall increase of only 25.4 percent. Individual proprietorships were second to corporations in 1963, both in count of establishments (73,355) and sales (6.6 percent of the total). Establishments operated by partnerships numbered 27,961 with 5.7 percent of total sales.

Both proprietorships and partnerships recorded decreases in establishment counts and percentage of total sales, 1963 compared with 1958. Cooperative associations (corporate and noncorporate), although relatively small in number of establishments (7,925) and sales (4.0 percent of the total in 1963), recorded an increase of 60.2 percent in sales, 1963 over 1958.

The pattern is somewhat similar among merchant wholesalers with corporations accounting for 80.4 percent of sales in 1963 and showing a 36.2 percent increase over 1958. Individual proprietorships and partnerships both recorded decreases in establishment counts, but the former recorded a sales increase of 8.9 percent, 1963 over 1958, compared with a decline of 17.4 percent for partnerships. Cooperative associations accounted for only 4.1 percent of sales among merchant wholesalers in 1963, but they showed a 65.4 percent increase over 1958.

Among merchandise agents and brokers, corporations accounted for 61.9 percent of 1963 sales, and they recorded a 36.9 percent increase over 1958. Individual proprietorships and partnerships showed decreases in estab-

lishments and also in sales, compared with 1958. Cooperative associations accounted for 7.3 percent of the 1963 sales for this type of operation.

TABLE W. Legal Form of Organization—United States: 1963 and 1958

Type of operation and legal form of organization	Establishments		Sales			
	1963 (number)	1958 (number)	1963		1958 (\$1,000,000)	Percent change, 1958 to 1963

Corporations (except cooperatives).....	13,277	10,482	32,933	61.9	24,049	36.9
Cooperative associations.....	561	444	3,897	7.3		
Other forms of organization.....	181		316	0.6	2,360	78.5

Data are shown separately in table 3 of chapter 7 for manufacturers' sales branches and sales offices, petroleum bulk plants and terminals, and assemblers of farm products, as well as for merchant wholesalers, and merchandise agents and brokers. Corporations predominate more heavily among manufacturers' sales branches and sales offices (99.5 percent of total sales) and petroleum bulk plants and terminals (88.7 percent) than among merchants.

Assemblers of farm products show a different pattern from other types of operation in that while corporations accounted for the largest portion of sales (43.4 percent), they did not predominate. Cooperative associations represented the second most important legal form with almost one-third of the total, 29.2 percent. Cooperatives, operating a smaller number of establishments—3,650 compared with 4,943—did a larger percentage of the business than the total for individual proprietorships and partnerships.

COMMODITY-LINE SALES

All wholesale businesses except petroleum bulk stations and terminals were requested to

analyze their 1963 sales, and report (from records or on the basis of best possible approximations) their sales by commodity lines or product classes. Two sets of questionnaires were used in the enumeration: one set covering merchant wholesalers, merchandise agents and brokers, and assemblers of farm products; and the other set for manufacturers' sales branches and sales offices. In the one set the commodity classifications were developed in the manner in which merchants, agents, and brokers classify their sales; whereas, in the other set the classifications were similar, but at a less detailed level, to those in the 1963 Census of Manufacturers.

Fifteen different questionnaires were used in enumerating merchants, agents, brokers, and assemblers (Forms CB-50A to CB-50R, except 50L; see appendix E to this volume), the forms differing primarily with respect to the commodity line inquiries. Each of the fifteen forms was designed for enumerating a group of related kinds of business and included a printed list of commodity lines generally handled by the trades. In total some 505 different commodity lines were identified on the various forms, 227 being numbered or major lines and 278 sub-items. For a complete list of commodity lines, see appendix B to chapter 8 of this volume.

Eleven different questionnaires were used in enumerating manufacturers' sales branches and sales offices (Forms CB-51A to CB-51L; see appendix E in the back of this volume), the forms differing in the product class inquiries. A total of 558 product classes or groups of product classes were measured as shown in appendix C to chapter 8.

Provision was made on all forms for respondents to write in lines not preprinted thereon.

Results of these inquiries are presented in chapter 8 of this volume, with an explanation of the commodity line tables appearing at the beginning of the chapter. An index showing page numbers on which individual kinds of

business or types of operation appears is presented in appendix A of the chapter.

As indicated in the "Explanation of commodity line tables," not all establishments reported the sales analyses, hence there are two types of tables: Tables 1A, 1B, and 1C present "total" sales for broad commodity lines projected from reported commodity line analyses; all other tables in chapter 8 present summaries of commodity line data "as reported," without projections for establishments not reporting the analysis.

Text table X presents projected totals from tables 1A and 1B, for six separate commodity lines of merchant wholesalers: confectionery; cigarettes, cigars, tobacco; new automotive equipment (except tires and tubes); meats, provisions; frozen foods; and electrical housewares, small appliances, and parts. Totals are shown for the United States, for geographic divisions, and for the 15 largest wholesale trade States.

In using the data it should be noted that there is some duplication in the sales figures because wholesalers sell, to some extent, to other wholesalers. This type of duplication is measured for the United States as a whole on a kind of business basis, but not commodity-

wise, in chapter 5 of this volume where it is noted, for example, that in 1963, 18.1 percent of the sales of confectionery wholesalers was from wholesaler-to-wholesaler. (See table 2, chapter 5.) Similarly, 12.3 percent of sales of tobacco distributors was from wholesaler-to-wholesaler, 30.5 percent of automotive equipment jobbers, 24.2 percent of meats and provisions wholesalers, and 27.7 percent of frozen food distributors.

Text table Y summarizes the information from table 6A for metals service centers in specified commodity-line sales expressed as a percentage of total sales of all commodities of establishments reporting the analysis. Data are shown for the United States as a whole and for geographic divisions.

Iron and steel flat products (plates, hot and cold rolled strip, sheets, black plate, tinplate, fabricated and structural plate products, etc.) represented almost one-fifth (19.8 percent) of the sales of metal service centers in the United States. The percentage varied by geographic division from a low of 11.5 percent in the West North Central division to a high of 27.2 percent in the East North Central.

Stainless steel (plates, strip, sheets, bars, etc.) represented almost one-tenth (9.2 percent) of the total for the country as a whole

TABLE Y. Commodity Line Sales of Metal Service Centers—United States and Geographic Divisions: 1963

(Commodity line sales expressed as a percent of total sales)

but ranged from a low of 2.3 percent in the Mountain States to a high of 19.6 percent in the New England States.

Copper and brass products also showed considerable variation by divisions—3.5 percent of the total in the East South Central to 17.9 percent in the Middle Atlantic States.

MISCELLANEOUS SUBJECTS

Chapter 9 of this volume presents tables on a number of subjects such as beginning- and end-of-year inventories, sales personnel, equipment used by iron and steel scrap processors, and central administrative offices and auxiliaries servicing wholesale establishments. A list of the subjects covered appears in the table of contents to the chapter, page 9-1. Some of the subjects are reviewed briefly in the following paragraphs.

Sales personnel—All wholesale questionnaires used in the 1963 Census of Business, except Form CB-50L used in enumerating petroleum bulk plants and terminals, provided for reporting the number of sales personnel for the workweek ended nearest November 15, 1963, the same period for which total employment was reported. The instructions provided for including as "sales personnel" all persons making sales, including owners of unincorporated businesses. Results of this inquiry are presented in tables 3 and 4 of chapter 9.

Merchant wholesalers reported approximately one-fourth (23.1 percent) of their personnel as engaged in selling during the workweek of November 15, 1963. Manufacturers' sales branches and sales offices reported 40.0 percent of their personnel so engaged, merchandise agents and brokers reported 34.2 percent, and assemblers of farm products, 12.0 percent.

Among the kinds of business of merchant wholesalers reporting 30 percent or more of their personnel as selling were automotive equipment wholesalers; paint, varnish wholesalers; confectionery wholesalers; electrical supplies, apparatus distributors; electronic parts, equipment distributors; service-establishment equipment supply houses; tobacco distributors; beer distributors; and wines, distilled spirits wholesalers.

Scrap Processing Equipment—Iron and steel scrap dealers with power processing equipment were requested to indicate which of the

following types of power equipment, if any, were used in the operation of their business: Alligator shears; hydraulic bailing presses; hydraulic guillotine shears; other power processing equipment.

There were 1,921 iron and steel scrap dealers in the United States in 1963 with power processing equipment as described above. Of this number, 1,399 reported that they used alligator shears in their business; 937 reported hydraulic bailing presses; and 290 reported use of hydraulic shears. 147 dealers indicated that they used power processing equipment but not of the type listed above.

Data on power processing equipment of iron and steel scrap dealers are presented in table 5 of chapter 9 of this volume.

Administrative Offices and Auxiliary Units—

Many multiunit firms (firms with two or more establishments) maintain administrative offices or auxiliary units which are apart from any wholesale establishment but engaged in servicing such establishments. Included in this category are such locations as central administrative offices, district offices, central warehouses, company garages, company research and development, etc. Such establishments may do some selling, but their primary function is to service company establishments that are primarily engaged in selling merchandise. Data for these types of establishments are presented in tables 7, 8, and 9 of chapter 9, but they are not included in any other tables.

There were 3,693 central offices and auxiliaries (for description see appendix C) primarily engaged in servicing company-operated wholesale establishments in 1963. These 3,693 establishments reported 143,900 employees as of mid-March and payroll for the year totaling in excess of \$1 billion. Sales were recorded as \$6 billion and inventories of merchandise on hand for sale at the end of the year valued (at cost) at \$799 million.

GUAM AND THE VIRGIN ISLANDS

The 1963 Censuses of Business, Manufactures, and Mineral Industries covered the Virgin Islands of the United States and the island of Guam as well as the United States. Separate reports were issued for each of the two possessions, reports identified as EC63-1 and EC63-2 of the 1963 Economic Censuses. Wholesale trade data from these reports are reproduced in Volume V, 1963 Census of Business and they are summarized in the accompanying text table Z.

TABLE Z. **Guam and the Virgin Islands: 1963 and 1958**

SAMPLE SURVEYS¹

Two studies were conducted covering merchant wholesalers in connection with the 1963 Census of Business based upon probability sample reporting rather than upon universe coverage. Results of these surveys were published in separate reports entitled: **Measures of Value Added In and By Merchant Wholesaling Firms: 1963** and **Capital Expenditures: 1963**. Data from these studies are reproduced in tables 12 through 19 of chapter 9 of this volume.

As the methodology of the sampling surveys differed from that used in developing other information on wholesale trade of the 1963 Business Census, the methodology, scope, procedures and special definitions used in these studies are reproduced here. Kind-of-business classification definitions are not reproduced here as they were the same, in principle, in the universe coverage and in the surveys.

MEASURES OF VALUE ADDED IN AND BY MERCHANT WHOLESALING FIRMS: 1963

Introduction—This study was prepared, in connection with the 1963 Census of Business, to provide several measures or approximations of value produced in and by merchant wholesaling firms. The provision of these measures reflects the growing interest in analyzing the “output” of the distribution trades and permits a comparison of the distribution sector of the economy with other sectors, such as manufacturing, agriculture, and mining. The need for these data has been reflected in recommendations of such

organizations as the Chamber of Commerce of the United States and the National Association of Wholesalers. Also, these measures are needed by the government to provide a sounder basis for its national accounts estimates. This is the first study of its kind by the Bureau of the Census in the field of wholesale trade.

The several measures of value produced in or by merchant wholesaling firms measure to differing degrees the value added to merchandise between the time and place of purchase by wholesalers and the time and place they sell it. Merchant wholesalers sell goods to retailers and other wholesalers for resale and to industrial, commercial, institutional and professional users. In addition to selling, merchant wholesalers perform a variety of functions including maintaining inventories of goods; extending credit; physically assembling, sorting and grading goods in large lots; breaking bulk and redistributing goods in smaller lots; delivery; refrigeration; and various types of promotion, such as advertising and label designing. The measures presented in this study provide approximations of the dollar value of the functions performed in the marketing process and are generally related to the costs incurred in and by merchant wholesaling firms.

To the extent that the measures account for all functions performed in merchant wholesaling operations, whether performed by merchant wholesaler firms or by other firms for merchant wholesalers, such measures represent the value produced in merchant wholesaling. The concept “gross margin” as used in the study includes the value of all materials (as distinguished from goods to be resold) and services provided by other firms, as well as those strictly creditable to the merchant wholesaling firm. Excluding “materials” provided by other firms results in what commonly has been called “value added.”

¹ The questionnaire used in the sample survey, Form Bus. 900, is reproduced in appendix E of this volume.

Excluding, in addition, "services" provided by other firms results in "net income provided (at market prices)." A further exclusion of certain tax items and of depreciation leads to the measure of "net income produced (at factor cost)" by merchant wholesaling firms. Further definition of these measures is as follows:

(1) **Gross margin**—total operating receipts less cost of goods sold (purchases adjusted for change in inventories). Gross margin is equivalent to the cost of all materials (as distinguished from goods to be resold) and services provided in merchant wholesale establishments whether provided by the merchant wholesaling firm itself or purchased by it from others. To the extent that it includes cost of contract work done by others on materials of the merchant wholesale firm, gross margin includes an element of value added by manufacturing.

(2) **"Value added"**—gross margin (as defined above) less the cost of containers, other supplies and materials, fuel, and electric energy and water purchased from other firms, and less contract work on materials of the wholesaler. "Value added" in merchant wholesale firms include the value of services purchased from other firms, and therefore falls between "gross margin" and "income produced."

(3) **Net income produced (at market prices)**—"value added" (as defined above) less cost of services supplied by other businesses (except interest payments), and less bad debts and other losses not compensated by insurance.

(4) **Net income produced (at factor cost)**—net income produced (as defined above) less depreciation, sales taxes, excise taxes, license fees and taxes other than income taxes. Net income produced (at factor cost) thus includes payroll, employer contributions to FICA, unemployment insurance, etc., interest payments, and profits before income taxes.

These measures are presented in detail by kind of business (tables 12 and 13), by size of firm (tables 14 and 15), and by legal form of organization (tables 16 and 17) of this volume. The study also included measures of the reliability of the data.

Summary of Data—Total operating receipts of merchant wholesalers during 1963 amounted to \$156.4 billion. After deducting the cost of goods sold, merchant wholesalers indicated a **gross margin** of \$28.5 billion, or 18.2 percent of total operating receipts. Further deducting the cost of containers, supplies and other materials, fuel and electric energy purchased from other firms and the cost of contract work done on materials owned by them, merchant

wholesalers showed a **"value added"** of \$27.1 billion, or 17.3 percent of total operating receipts. After cost of all materials and services supplied by **other** businesses were deducted from total operating receipts, merchant wholesalers showed a **net income produced (at market prices)** of \$19.9 billion or 12.7 percent of total operating receipts. After further deducting depreciation, license fees and taxes (except income taxes), **net income produced (at factor cost)** amounted to \$17.3 billion or 11.1 percent of total operating receipts.

Total operating receipts in the durable goods trades—\$67.4 billion—represented 43 percent of the total operating receipts of all merchant wholesalers. However, the durable goods trade accounted for about 55 percent of income produced and about 58 percent of total payroll. Income produced ratios for the durable goods trades were generally higher than those for the nondurable goods trades. Durable goods trades, in total, reported a gross margin of 22.5 percent of total operating receipts in 1963 as compared to a gross margin of 14.9 percent shown for the nondurable goods trades. **Net income produced (at market price)** amounted to 15.7 percent of total operating receipts in the durable goods trades as compared to 10.4 percent for the nondurable goods trades. **Net income produced (at factor cost)** amounted to 14.5 percent of total operating receipts in the durable goods trades as compared to 8.5 percent in the nondurable goods trades.

Ratios varied considerably for individual kinds of business. **Gross margins** ranged from a high of 31.9 percent to a low of 4.2 percent of total operating receipts; **"value added"** varied from 30.1 to 4.1 percent; **net income produced (at market prices)** varied from 22.3 percent to 2.0 percent; while **net income produced (at factor cost)** ranged from 21.1 percent to 1.9 percent. Cotton merchants reported the lowest ratios for all measures. Stationery, office supplies; commercial machines, equipment; automotive equipment, tires, tubes; professional equipment, supplies; and service-establishment supplies were among the trades reporting the highest ratios.

Ratios, by kind of business, are shown in table 13, while the dollar volume estimates of these measures are shown in table 12.

Ratios varied by size of firm, with the larger firms showing smaller ratios of these measures to total operating receipts. Firms with operating receipts of \$10 million and over indicated a gross margin of 12.0 percent in 1963, only about one-third of the gross margin of 34.9 percent reported by firms with annual operating receipts under \$100,000. Ratios for the other

measures as well as the annual payroll showed a similar relationship with firms in the largest size-class reporting ratios only about one-third of the ratios for the smallest group. Ratios by size of firm are shown in table 15, while the dollar volume estimates of these measures are shown in table 14.

Limited function wholesalers, such as drop shippers (who perform no storage function) would be expected to have a smaller ratio than full service wholesalers. A special study in two trades—furniture and lumber—indicated that firms without inventories reported a significantly lower ratio than those which maintained inventories. Below are results of this study:

Measures of value produced	Percent of total operating receipts			
	Furniture wholesalers		Lumber wholesalers	
	With inventories	Without inventories	With inventories	Without inventories
Gross margin.....	26.6	18.6	15.9	7.6
"Value added".....	25.4	17.9	15.4	7.4
Net income produced (at market prices).....	16.7	10.8	11.2	5.4
Net income produced (at factor cost).....	15.5	10.2	10.0	5.0
Annual payroll.....	12.4	6.5	7.4	2.4

Tables 16 and 17 present data by legal form of organization. Corporations, which accounted for over 80 percent of total operating receipts, showed ratios differing only slightly from the summary trade totals. Individual proprietorships indicated the largest ratios, reflecting the smaller firm size characteristic of this group. Partnerships showed somewhat lower ratios than individual proprietorships, while cooperatives indicated the lowest ratios by legal form of organizations.

Explanation of "Value Added" Terms

Total operating receipts—This item includes total sales of merchandise on own account, after deducting all returns, allowances, and discounts but including sales and excise taxes collected from customers; commissions received for sales and purchases of merchandise for the account of others; subsidy payments received for the sales of goods; and any other receipts from customary business activity.

Total operating receipts, as shown in this study, differ from total sales, as shown in other Census of Business data, because commission sales—or sales on the account of others—are included in total operating receipts only at the amount of commission earned—whereas they are included in total sales at the value of the goods sold. The difference between total operating receipts and total sales in 1963 was less than 0.5 percent. For individual kinds of business it differed at most by 2 percent, for most kinds of business by less than 1 percent.

Cost of goods sold—This item is not shown separately in this study but may be obtained by subtracting gross margin from total operating receipts. Regarding the comparability of cost of goods sold with the Internal Revenue Service Statistics of Income data see "comparison with other data" below.

Cost of goods sold was compiled for each firm in this survey by adding to the opening inventory all purchases of merchandise during the year and commissions paid to others for purchases on own account and then deducting from the total the end-of-year inventory. Purchases are net of returns, allowances, and trade and cash discounts but include payments for freight, insurance, import duties and other charges for purchases. Reporting firms were instructed to exclude, where possible, purchases of containers, wrapping, packaging, and selling supplies which were to be reported under "operating expenses."

Purchases of tax stamp and payments of excise taxes often included by tobacco and liquor wholesalers in their purchase accounts were, for purposes of this survey, excluded from cost of goods sold and included as a separate item under "operating expenses" used to derive net income produced (at factor cost).

Operating expenses—In the 1963 Census of Business, information was collected on operating expenses for all wholesale establishments. However, this information was not available in the amount of detail needed to develop the various measures shown in this study. Separate information was therefore requested in this survey on the following operating expenses:

Employer contributions to unemployment insurance, pensions, welfare, and other insurance plans.

Taxes and license fees (excluding income or payroll taxes).

Depreciation.

Purchases of office supplies, stationery, and postage.

Payments of containers, wrapping, packaging, and selling supplies.

Cost of contract work done by others on materials of the reporting firm.

Commissions paid to other firms for sales of merchandise on your account.

All other operating expenses (excluding interest on loans).

A detailed instruction to each of these expense items is included on the questionnaire itself which is shown in appendix E.

Scope of the Survey—This study is limited to merchant wholesalers, which constitute the major portion of the broad field of wholesale trade and excludes the other types of wholesale trade, such as manufacturers' sales branches and sales offices, petroleum bulk plants, agents and brokers, and assemblers of farm products. In terms of total payroll, merchant wholesalers accounted for more than 60 percent of the payroll for total wholesale trade. All kinds of business in which merchant wholesalers operate are represented. A description of each kind of business for which data are shown in this study is included in appendix B of this volume.

Data shown in this study are based, in part, on information collected from all merchant wholesalers (which, by definition, are limited to firms with one paid employee or more) in the 1963 Census of Business and, in part, on information collected from a separate sample survey. The information on total operating receipts in this study was collected in the 1963 Census of Business from all merchant wholesalers in operation during 1963. However, information on total operating receipts, costs of goods sold, and the detailed operating expenses needed to develop measures of value produced in and by merchant wholesaling firms was not collected from all wholesalers but was limited to a sample of about 10,000 firms—a subsample of the reporting panel of over 17,000 firms used to obtain the monthly sales and inventories data in the Bureau's *Monthly Wholesale Trade Report*.

Sample design—The sample is a probability sample representing merchant wholesalers in all kinds of business and was selected from two sources:

- (a) 1958 Census of Business lists representing all wholesalers (with paid employees) in business in 1958.
- (b) Social Security Administration lists of wholesalers (with paid employees) entering business (or requesting new EI numbers) since 1958.

A systematic random sample was drawn from the 1958 Census of Business lists, which had been sorted by sales size and by kind of business, at rates varying according to the sampling variability and the sales volume of each sales-size group. The sample was supplemented from the lists of wholesale birth obtained from SSA which were sampled in a two-stage sampling procedure. A first-stage sample was selected on the basis of broad trade groups and employee-size classes. On the basis of additional information by kind of business and sales size obtained from the first-stage sample, the firms were arranged by kind of business and sales-size groups approximating those used for the census sample and then a second-stage sample was selected for additions to the sample initially drawn from the 1958 census.

The number of firms in the sample used for the *Monthly Wholesale Trade Report* varied for each kind of business from 50 to 650 firms, depending upon the total number of firms in the trade and their distribution by sale size. However, number of firms canvassed for this study to provide measures of value produced in and by merchant wholesaling firms averaged about 200 firms per kind of business—ranging from 34 to 372 firms by kind of business. A more detailed description of the sample design is included in the Bureau's *Monthly Wholesale Trade Report*.

Estimates and Ratios—Total operating receipts as shown in this study, were derived from figures collected in the 1963 Census of Business. These figures were also compiled in connection with the sample survey. The ratios to total operating receipts shown in the study were obtained from the sample survey; the dollar volume estimates were derived by multiplying the ratios obtained from the sample survey by the total operating receipts obtained from the 1963 census. The sampling variability of the dollar volume estimates, therefore, is the same as the sampling variability of the ratios. The total operating receipts figure for all merchant wholesalers derived from the census was about 1.3 percent higher than the figures estimated in the sample survey. For many individual kinds of business these differences were more substantial.

Differences between the 1963 census figures and the sample survey figures are attributable to—

- (a) Sampling errors of the sample survey estimates.
- (b) Changes in kind-of-business classification between the 1958 and 1963 census years.

- (c) Exclusion from the sample survey of firms out of business at the end of 1963.
- (d) Inclusion in the sample survey of data for auxiliary facilities of wholesale establishments.

Respondents in the sample survey were requested to report, on a consolidated basis for **all wholesale** establishments and their auxiliary facilities—warehouses, garages, etc.—operated under the Federal Employer Identification Number selected in the sample. Although the “operating expense” figures for wholesale establishments in the 1963 census did include a pro-rata share of the general office expenses, the “payroll” figures in the 1963 census did not include payrolls for their administrative and auxiliary establishments. However, in the sample survey, the payroll figures did reflect the payrolls of the administrative and auxiliary units. The payroll figures shown in this study for all merchant wholesalers is therefore about 5 percent higher than payroll figures reported for merchant wholesaler establishments in the 1963 census.

The volume estimates and ratios for summary trade groups were obtained by the addition of the volume estimates computed for individual kinds of business as shown in tables 12 and 13. The same summary trade totals are shown in tables 14 to 17. However, they do not add to the detail, by size of firm or by legal form of organization, shown in these tables for several reasons:

- (a) Sampling variability of the detail lines.
- (b) Part-year reporters included in the KB totals are not shown by size class.
- (c) Some size classes are not shown separately because of extreme variability.

Limitations of the Data

Sampling variability—Since the total operating receipts figures shown in this study are based on a complete enumeration of merchant wholesalers in the 1963 census, they are not subject to sampling variability. However, the selected measures of value produced which are based on a sample are subject to sampling variability and thus are not expected to be in exact agreement with the results that would have been obtained from a complete enumeration.

Sampling errors were computed for each of the selected measures of value produced

shown on this study. The range of the sampling variability of the measures for each kind of business, size class, and legal form or organization are shown in tables 13, 15, and 17 at the 1-sigma level, i.e., chances are 2 out of 3 that the estimates would differ from the results of a complete enumeration by less than the percentages shown. In general, the range of sampling variability of the value-produced measure for a given kind of business or size-class was small and the largest sampling error was attributable to the net income produced (at factor cost).

Data have been deleted from the tables where the sampling variability was considered excessive. Where such deletions have been made the applicable tables have been footnoted.

Response and other nonsampling errors—

The measures of sampling variability do not include biases which might arise from non-sampling errors such as the failure of respondents to submit correct figures or to submit reports on time for tabulation. Information is not available as to the extent of bias that may be due to errors in reporting. However, to minimize reporting errors, all reports were reviewed for completeness and consistency of the reported data. The various value-produced ratios were calculated mechanically for each report, compared with ratios for other firms in the same kind of business, and all extreme and unusual ratios subjected to correspondence for verification and correction. A small number of firms did not report in time for the closeout of this survey and imputed figures were included for these firms based on other available records. Imputation for such nonresponse amounted to less than 5 percent of the total operating receipts.

Period covered by return—Data published on this study does not necessarily cover calendar year 1963. Although respondents were requested to provide data on a calendar year basis, fiscal year reports were accepted. Approximately one-fourth of the firms in this survey reported data on a fiscal year basis. An analysis of these indicated the following distribution of the fiscal year reporters:

June 30—5.2 percent
 March 31—2.5 percent
 Sept. 30—3.7 percent
 All other months—13.6 percent (each 1.5 to 2 percent)

Comparison with Other Data

Statistics of Income, Internal Revenue Service (IRS)—**Statistics of Income**, issued by the Internal Revenue Service, provides information on business receipts, costs of goods sold, and selected expense items compiled from the Federal income tax returns. However, the published information is not sufficiently detailed to provide income-produced measures comparable to those published in this study. Cost of goods sold—as published in **Statistics of Income**—includes some costs of labor, materials, and supplies in addition to purchases of merchandise during the year, adjusted for changes between beginning- and end-of-year inventories; cost of goods sold—as used in the Census Bureau survey—excludes salaries and wages paid to own employees, and cost of packaging materials and office and other supplies.

Business receipts as shown in the **Statistics of Income** are comparable to total operating receipts as shown in this report. However, the statistics of income data for wholesale trade include all types of wholesalers while this study is limited to merchant wholesalers. Moreover, the IRS data are compiled on a company basis covering all establishments of the firm. Thus, retail, manufacturing, and other establishments operated by firms primarily wholesalers are included in the IRS data; on the other hand, merchant wholesale establishments operated by firms primarily engaged in manufacturing or retail trade are not represented in the IRS statistics for wholesale trade.

National Income Originating, Office of Business Economics (OBE)—OBE prepares measures of national income originating for each of the industries of the economy, including wholesale trade. National income originating for an industry represents the total factor cost incurred by that industry in producing its output. Factor costs include compensation of employees, income of unincorporated enterprises and corporate profits, including an inventory valuation adjustment, and net interest. These data are derived from a variety of sources, including the Bureau of Employment Security, Internal Revenue Service, and other government and private organizations. For the bulk of the income originating data, the industrial classification is based on the classification of establishments. However, for such items as corporate profits and net interest, the company is the basis of the industry classification.

National income originating includes an inventory valuation adjustment and an allowance for bad debts in the accounts of bankrupt debtors not reflected in net income produced (at factor cost); on the other hand, it excludes interest receipts which are included in the net income produced. These differences are relatively small. A more significant difference between these measures is due to coverage. The OBE estimate of national income originating—which amounted to \$26,688 million in 1963—covered all types of wholesalers, while the Bureau of the Census estimate of net income produced (at factor cost)—amounting to \$17,341 million in 1963—was limited to merchant wholesalers. Merchant wholesalers accounted for 64 percent of total payroll of all wholesalers—virtually the same relationship indicated by the census estimate of net income produced (at factor cost) and the OBE estimate of national income originating.

Manufacturing and Mineral Industries—“Value added” in manufacturing published by the Bureau of the Census is computed by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments plus receipts for services rendered. This figure is further adjusted to include the value added by any merchandising operation (difference between sales prices and cost value of any merchandise sold without further manufacture, processing or assembly) and to reflect the net change in finished goods and work in process inventories between the beginning and end of year.

The definitions of “value added” in manufacturing and in merchant wholesaling are comparable except for the treatment of excise taxes. These taxes are not included in “value added” in manufacturing, but for merchant wholesalers these taxes are reflected in the gross margin, “value added,” and net income produced (at market prices) measures, though not in the measure of net income produced (at factor cost).

The use of a “value added” measure rather than an “income produced” (or originating) measure in manufacturing initially was dictated by reporting considerations. With the growing importance of purchased services, “value added” has become increasingly less satisfactory as a substitute for “income produced.” For all manufacturing industries combined, the ratio in 1958 of national income originating (as estimated by the Office of Business Economics) to “value added” was 73.5

percent of "value added." For all merchant wholesale trades combined, as summarized in this study, the ratio of net income produced to "value added" is 63.9 percent. It should be noted that the difference in handling of excise taxes contributes to the difference between the two ratios and that the ratios for individual manufacturing industries and for individual wholesale trades often vary considerably from the average.

"Value added" in the mineral industries differs slightly from the manufactures definition. It is computed by subtracting the cost of supplies, minerals received from other establishments for preparation, purchased fuel and electricity, contract work, and purchased machinery installed from the value of shipments and receipts and capital expenditures. It thus provides a measure, not only of the "value added" in mineral production, but also in the development of mineral properties.

CAPITAL EXPENDITURES: 1963

Capital expenditures of merchant wholesalers, retail stores, and selected service establishments were measured on a sampling basis for the year 1963, and the results were published in a separate report entitled "**Capital Expenditures: 1963**," BC42-63. For purposes of the report, capital expenditures were defined to include all costs actually incurred during 1963 which were chargeable to the fixed assets accounts of the firm, including expenditures for facilities under construction at the end of 1963. Included were all expenditures (whether on contract or by employees of the firm) for new or used structures, fixtures, and equipment, and for improvements, reconditioning, modifications, and additions to existing facilities, which were subject to depreciation on the Federal Income Tax Report. Excluded were expenditures for land and charges for repairs, supplies, and other items chargeable as current operating expenses. In the case of motor vehicles or other expenditures for both personal and business use, only that portion allocated to the business is included. Expenditures by firms which went out of business in 1963 were omitted from this report, but expenditures in 1963 by firms opening for business in 1964 were included.

The statistics in the report are limited to the capital expenditures of the operators of the establishments surveyed and exclude expenditures by owners of those properties leasing or

renting the property to others. Thus, expenditures at trade and service establishments by real estate firms were omitted. In the case of firms reporting on an organizational basis this survey covers expenditures by the firms for structures which on completion had been or were to be sold and leased back.

The statistics in the report are summarized by type of trade on the basis of the classification of the establishments covered. In the case of companies operating establishments in more than one type of operation covered by this survey (e.g., retail and wholesale trades), separate figures were obtained by type of trade. Firms also engaged in operations not in scope of this survey (e.g., manufacturing) were canvassed only for their retail, wholesale, and service establishments. This approach differs from the procedures followed in compiling quarterly data on capital expenditures by the Office of Business Economics (OBE), Department of Commerce, in conjunction with the Securities Exchange Commission (SEC). The latter series is based on the classification of the principal activity of the company as a whole, with one report filed covering all establishments of the firm, whether or not classified in the same business. The OBE-SEC series also differs in that the service and wholesale activities covered in the latter series are broader in scope than the coverage for these trades in this report.

The sample design for the **merchant wholesaler** portion of the report was the same as that in the "**Measures of Value Added In and By Merchant Wholesaling Firms: 1963**" report, with a similar measure of reliability. (See page . . .) Data for the merchant wholesaler are reproduced in tables 18 and 19 of chapter 9 of this volume.

Brief Summary of Results

Total capital expenditures of merchant wholesalers amounted to \$1.1 billion in 1963, an increase of 28 percent over the \$886 million reported in 1958. Expenditures of \$974 million for new facilities in 1963 (including new structures and new equipment) accounted for 86 percent of this total, with the largest amount, \$714 million (73 percent), directed toward new equipment and the remainder, \$260 million (27 percent), expended for new structures.

Capital expenditures in the durable goods trades totaled \$548 million in 1963, an in-

crease of 19 percent over 1958. Nondurable goods wholesalers, with total capital expenditures of \$586 million in 1963, showed a more substantial increase (38 percent) over 1958.

Nearly equal amounts of capital outlays for new facilities were reported by both durable and nondurable goods wholesalers in 1963, and among both groups expenditures for new fixtures and equipment were substantially greater than outlays for new structures and additions (a pattern essentially unchanged from the distribution reported in 1958). The durable goods group reported expenditures of \$363 million for new equipment (a 41 percent increase over the investment reported in 1958) while the nondurable goods group reported new equipment expenditures of \$351 million (up 54 percent from 1958). These outlays for new equipment,

in 1963, accounted for 75 percent of the total new capital investment reported by durable goods wholesalers and 71 percent of the total new capital invested by the nondurable goods group.

Among the selected kinds of business published in this study, increases over total capital outlays in 1958 were reported in all trade groups except lumber, construction materials (which declined 60 percent) and farm products, raw materials (down 29 percent).

Corporations reported total capital outlays of \$888 million in 1963, an increase of 36 percent over the \$655 million reported in 1958. Expenditures of \$756 million for new facilities accounted for 85 percent of this total, with the larger outlay (53 percent) attributed to the durable goods groups.

List of Corrections

Volume IV has been prepared primarily by assembling and binding the tabular portions of previously issued subject reports together with chapters covering additional phases of wholesale trade which are not issued in report form. This plan was adopted to reduce publication cost and to expedite issuing

the data. The corrections appearing below represent revisions noted after the individual subject reports were issued and should be taken into consideration in using volume IV and the subject reports from which it was assembled.
